GRAVITA

Gravita es una tecnología superior, modulable y con un espesor de 7,8 mm que convierte la superficie en volumen y la creatividad en una experiencia visual y táctil.

Gracias a la combinación de tinta estructurante, cola digital y granilla aspirada, Gravita genera relieves tridimensionales con gran precisión, desde sutiles bajorrelieves hasta altorrelieves, siempre con una continuidad tonal que permite combinar las piezas sin perder armonía. El resultado son superficies continuas que despiertan los sentidos y elevan la calidad perceptiva del producto final. Además de aportar realismo a acabados inspirados en materiales naturales, Gravita ofrece versatilidad, optimización de recursos y procesos más eficientes, con la sostenibilidad como valor esencial.

Gravita is a superior, modular technology with a 7.8 mm thickness that transforms surface into volume and creativity into a visual and tactile experience.

Through the combination of structuring ink, digital glue and applied grit, Gravita generates three-dimensional reliefs with great precision, from subtle low-reliefs to pronounced high-reliefs, always with tonal continuity that allows pieces to be combined without losing harmony. The result is continuous surfaces that awaken the senses and enhance the perceptual quality of the final product. In addition to adding realism to finishes inspired by natural materials, Gravita offers versatility, optimized resource use and more efficient processes, with sustainability as an essential value.

PORCELAIN

La resistencia que la naturaleza ha logrado desarrollar durante milenios, gracias a la tecnología, se consigue en cuestión de horas. Los Materiales porcelánicos alcanzan una durabilidad comparable a la de la roca, gracias a la selección precisa de materias primas, el proceso de prensado y los ciclos térmicos a los que se somete. Como resultado final, un diseño refinado que adapta los patrones naturales a miles de gráficos, integrándolos perfectamente en nuestras colecciones de porcelánico.

The resistance that nature has developed over millennia is achieved in just a few hours through technology. Porcelain materials offer the same durability as rock, thanks to the precise selection of raw matter, the pressing process, and the thermal cycles they undergo. The final result is an exquisite design that adapts natural patterns into thousands of graphics, seamlessly integrated into our porcelain collections.

El avance tecnológico y la investigación de nuestro departamento de I+D+i han permitido desarrollar una gama de porcelánicos con espesor reducido a 6.7-6.8 mm, manteniendo sus propiedades esenciales como resistencia, diseño y durabilidad. Esto ha logrado un ahorro del 30% en materias primas y energía, reduciendo las emisiones de CO2. El material es más flexible, facilitando su manejo y colocación, y su menor peso optimiza los costos de transporte. La tecnología de prensado avanzada y las materias primas optimizadas mejoran su resistencia, resultando en un material más compacto, ligero y duradero.

ECO RED

Eco Red comprende los productos de pasta roja, elaborados a partir de arcillas rojizas que caracterizan esta tipología de material cerámico. Este tipo de cerámica es especialmente versátil, utilizándose comúnmente para revestimientos de pared, aunque su versión para pavimento no debe pasarse por alto. Gracias a su composición, Eco Red ofrece una estética cálida y natural, además de una excelente resistencia, lo que lo convierte en una opción ideal tanto para aplicaciones verticales como horizontales.

Eco Red includes red-body products, made from reddish clays that define this type of ceramic material. This ceramic is especially versatile, commonly used for wall coverings, though its version for flooring should not be overlooked. Thanks to its composition, Eco Red offers a warm, natural aesthetic, along with excellent durability, making it an ideal choice for both vertical and horizontal applications.

Evolución responsable, inspiración sostenible.

En Ecoceramic creemos que cada creación debe nacer con respeto por la tierra. Desde la elección de las materias primas hasta el último detalle de nuestro proceso, cuidamos cada gesto para reducir nuestra huella y honrar los recursos que nos rodean. Nuestra energía proviene del sol, con miles de paneles que nos permiten transformar la luz en energía limpia para producir sin agotar. Gracias a ello, evitamos que toneladas de CO₂ lleguen al aire que todos compartimos. El agua y los residuos vuelven a tener vida dentro de nuestro ciclo productivo, porque nada debería desperdiciarse cuando se habla de futuro. Priorizamos lo cercano: proveedores locales, materias primas de proximidad y prácticas que impulsan la economía de nuestro entorno. Apostamos por la innovación para avanzar hacia una producción más responsable, explorando nuevas energías como el hidrógeno y reforzando nuestro compromiso con la descarbonización. Cada colección que diseñamos busca perdurar, adaptarse y acompañar la arquitectura sostenible del mañana. Porque nuestra visión es clara: dejar una huella cada vez más ligera, un legado de respeto y equilibrio entre la belleza de lo que creamos y la naturaleza que nos inspira.

Responsible evolution, sustainable inspiration.

At Ecoceramic, we believe that every creation must be born with respect for the earth. From the selection of raw materials to the final detail of our process, we carefully manage every step to reduce our footprint and honor the resources around us. Our energy comes from the sun, with thousands of panels that allow us to transform light into clean power to produce without depletion. Thanks to this, we prevent tons of CO₂ from entering the air we all share. Water and waste are given new life within our production cycle, because nothing should be wasted when it comes to the future. We prioritize proximity: local suppliers, nearby raw materials, and practices that boost the economy of our community. We bet on innovation to advance towards more responsible production, exploring new energies like hydrogen and strengthening our commitment to decarbonization. Every collection we design aims to endure, adapt, and support the sustainable architecture of tomorrow. Because our vision is clear: to leave an increasingly lighter footprint, a legacy of respect and balance between the beauty of what we create and the nature that inspires us.
